Date of Examination : 17-05-2023

Time : 3 Hrs.

Max. Marks : 60

INSTRUCTIONS TO CANDIDATES :

1. SECTION-A is COMPULSORY consisting of TEN questions carrying TWO marks each.
2. SECTION-B contains FIVE questions carrying FIVE marks each and students have to attempt any FOUR questions.
3. SECTION-C contains THREE questions carrying TEN marks each and students have to attempt any TWO questions.

SECTION-A

1. Write briefly :

- a) Define Atom and Molecule.
- b) Significance of wave function.
- c) Inductive Effect.
- d) Enantiomers with examples.
- e) Dipole moment.
- f) Flying wedge projection formula.
- g) Meso compounds using suitable examples.
- h) Erythro and Threo nomenclature.
- i) Define racemic resolution.
- j) Centre of symmetry.

SECTION-B

2. What are isomers? Give its types using suitable examples.
3. Discuss Bor's Atomic model along with its merits and demerits.
4. Comment on IUPAC system of nomenclature using suitable examples.
5. What is racemic modification? Give methods for performing racemic modifications.
6. Discuss on the stereochemistry of Allenes and Biphenyls

SECTION-C

7. Discuss in detail about methods used for the resolution of chiral mixture
8. Give the details of :
 - a) Hydrogen bonding
 - b) Conjugation
 - c) Resonance
 - d) Polarity of bonds.
9. Write in detail about Quantum numbers and their significance

A leader is made, not born. A true leader is not necessarily the one at the helm of affairs; he is one whose position others would want to emulate. So, who is a true leader? A true leader is one who would be able to guide others, either by doing something himself or by directing a specific course of action. A sympathetic or a democratic leader is one who understands the problems of others at the workplace. He has a sympathetic word for them and he is able to understand them and always has an encouraging word for his teammates or colleagues. In today's competitive world, enhancement of one's standing in the workplace depends not on the number of years put in as in the good old days, but on performance, on actual results. If you are capable of outstanding work, your stature in an organization automatically goes up and there would be many who would want to emulate you. This attribute makes you a leader in the true sense of the term. "Can I aspire to be a leader?" You might ask yourself that question. Yes, definitely. Put in the right effort in the right direction and a leader what you shall be. If you want to succeed in life, you need to have firm determination. Our ways of achieving things might be entirely different because each one of us is a unique individual.

Time : 3 Hrs.

Max. Marks : 60

INSTRUCTIONS TO CANDIDATES :

1. SECTION-A is COMPULSORY consisting of TEN questions carrying TWO marks each.
2. SECTION-B contains SIX questions carrying TEN marks each and students have to attempt any FOUR questions.

SECTION-A

Write briefly :

1. Differentiate primary and secondary data.
2. Discuss statistical errors.
3. Explain ways to classify numerical data or raw data.
4. Give advantages and disadvantages of diagrammatic presentation of data.
5. Discuss various types of graphs.
6. Give characteristics of a good average.
7. Write relation between arithmetic mean, median and mode.
8. Find the median for 7, 8, 5, 3, 10, 15, 21, 19, 17.
9. Define Measures of Dispersion. Also, discuss properties of a good measure of dispersion.
10. Give formula for calculating coefficient of variance.

SECTION-B

11. Discuss Components of a Statistical Table. What are the various types of Statistical Tables?
12. The average production of rice given in five districts (A, B, C, D, E) in West Bengal for last five years expressed in '000 metric tons. Draw a pie-chart of the above data. Figures within bracket indicating the production.

Dist.-A (2180), Dist.-B (1860), Dist.-C (1250), Dist.-D (840), Dist.-E (570).

13. Find the arithmetic mean of the following frequency distribution :

Height (in inches)	61-63	63-66	66-69	69-72	72-75	75-78
No. of Persons	8	28	118	66	16	8

Find also the median height.

14. The median and mode of the following frequency distributions are known to be 27 and 26 respectively. Find the values of 'a' and 'b'.

Class Interval	0-10	10-20	20-30	30-40	40-50
Frequency	0	a	20	12	b

15. Calculate the mean deviation from the mean of the following frequency distribution.

SECTION-B

- Q11. Write properties of Polysaccharides.
- Q12. List properties of Fatty acids.
- Q13. Discuss the concept of Activation energy and Transition state.
- Q14. Write a note on Glycoproteins.
- Q15. Discuss the process of Glycogenolysis.

SECTION-C

- Q16. Elaborate on Glycolysis and fate of Pyruvate.
- Q17. What is β -Oxidation? Discuss Steps involved.
- Q18. How are Enzymes Classified? Discuss.

NOTE : Disclosure of Identity by writing Mobile No. or Making of passing request on any page of Answer Sheet will lead to UMC against the Student.

SECTION-B

11. a) What is the use of Algorithms in developing a program? How is it different from Flowcharts?
b) Write a C program to reverse a string.
12. Describe the following :
 - a) Unions and Structures
 - b) Macros in C
13. What do you mean by Recursion? What is the use of recursion in C programs? Write a program to find factorial of a number using recursion.
14. a) Describe the use of Arrays in C program with an example.
b) List the various operators used in C along with its precedence.
15. Write brief notes on :
 - a) Difference between If-else and Nested- if statement.
 - b) Use of Switch statement in a C program.
16. a) What are Functions? How are Functions declared and parameters passed to functions?
b) Write a C program to print the average of all numbers from 1 to 50.

- 1) How important is effective communication in today's business world? Discuss a few aspects of business where communication is very important.
- 2) Media communication such as computer, cell phone, LCD, video, TV etc. has become a major means of communication. Discuss its role in changing the culture of a society.
- 3) Analyse and interpret the following passage in your own words :

There are hundreds of superstitions which survive in various parts of the country and the study of them is rather amusing. We are told, for example, that it is unlucky to point to the new moon or to look at it through glass, but if we bow nine times to it we shall have a lucky month. Now suppose you tell a scientist that you believe a certain superstition - let us say, that the howling of a dog is a sign of death. The scientist will immediately require evidence before he can accept your belief. He will want figures to prove it. Your superstition may impress an ignorant person but it cannot face the light of facts. Your case would not carry conviction in a court of law. Any intelligent man will want to know the "reason why". What connection can there be between a howling dog and an approaching death.

- 4) Write a letter to your friend discussing the effect of different kinds of violence that plague the society.
- 5) Write a detailed analysis of any book that you have recently read.

SECTION-B

- 1) Explain the difference between histogram and frequency polygon as a graphical representation of the distribution of data, by taking suitable examples.
- 2) Define Variance and standard deviation of a sample. Calculate the variance and standard deviation of the following data :
 X: 16, 8, 14, 15, 13, 11, 11, 19, 10, 7.

May-2019

- 4) Explain Bayes' Theorem with an example.
- 5) Define Hypothesis. A manufacture claimed that at least 95% of the equipment which he supplied to a factory conformed to specifications. An examination of a sample of 200 pieces of equipment revealed that 18 were faulty. Test his claim at 5% level of significance.
- 6) Write a short note on :
 - a) Trial
 - b) Event
 - c) Sample space

SECTION-C

- 7) Calculate Mean, Median and Mode of the following distribution : (10)

Size	0-5	5-10	10-15	15-20	20-25	25-30	30-35
Frequency	7	13	25	30	20	4	1

- 8) There are three main brands of a certain powder. A set of its 120 sales is examined and found to be allocated among four groups A, B, C, D and brands I, II, III as shown under :

Brand	Groups			
	A	B	C	D
I	0	4	8	15
II	5	8	13	6
III	18	19	11	13

- Is there any significant difference in brands preference? Answer at 5% level of significance using one way ANOVA Table. (Take 10 as the code value to subtract from all given values in your working) Given $F_{0.05} = 3.35$
- 9) a) Explain the term probability distribution. How Binomial distribution differs from Poisson distribution? Explain with help of examples. (7)
 - b) The probability of a man hitting a target is $\frac{1}{4}$. If he fires 7 times, what is the probability of his hitting the target atleast twice? (3)

BIOCHEMISTRY

Subject Code : BSBT-103-18

M.Code : 75326

Max. Marks : 60

Time : 3 Hrs.

INSTRUCTIONS TO CANDIDATES :

1. SECTION-A is COMPULSORY consisting of TEN questions carrying TWO marks each.
2. SECTION-B contains FIVE questions carrying FIVE marks each and students have to attempt any FOUR questions.
3. SECTION-C contains THREE questions carrying TEN marks each and students have to attempt any TWO questions.

SECTION-A

1. Define :
 - a) Heteropolysaccharides
 - b) Gangliosides
 - c) Prosthetic group
 - d) Coenzymes
 - e) Glycogenolysis
 - f) Apoenzyme
 - g) Essential fatty acids
 - h) Prostaglandins
 - i) Active site
 - j) Specific activity.

May - 2019

SECTION-B

2. Discuss properties of Monosaccharides.
3. List properties of Nucleic acids.
4. What are Phospholipids? List structure and function.
5. What is β -Oxidation? Discuss.
6. Write a note on Oxidative phosphorylation.

SECTION-C

7. Discuss levels of organization of protein structure.
8. What is TCA cycle? Discuss its significance and the steps involved.
9. Discuss mechanism and significance of pentose phosphate pathway.
